Annex 3: Food for Peace Comprehensive List of Indicators for Title II development food assistance programs

Indicator Number	Program Objective/Result	SPS Location	ID number under SPS location	Indicator Title	R - required/ mandatory RiA - required if applicable S - standard	Source	Who collects?	Frequency of collection?	Indicator Type	Data points requested (if more than one data point)	Disaggregation
1	Reduce Food Insecurity in Vulnerable Populations	3.1.9	16	Prevalence of underweight children under five years of age	R	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact	a. percent of children 0-59 months of age in the sample that is underweight b. total population of children 0-59 months of age in zone of influence	Sex: Male, Female
2	Reduce Food Insecurity in Vulnerable Populations	4	16	Prevalence of Poverty: Percent of people living on less than \$1.25/day	R	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact	a. Percentage of people from sample living on <\$1.25/day b. Total population of people in zone of influence	Gendered Household Type: Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Male and Female Adults (M&F), Child No Adults (CNA)
3	Reduce Food Insecurity in Vulnerable Populations	N/A		Mean Depth of Poverty	R	FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact	a. Mean Depth of Poverty b. Total population of people in zone of influence	

First L	evel Objective 1: Inclu	sive Agri	iculture S	ector Growth							
4	Inclusive Agricultural Sector Growth	4.5	?	Women's Empowerment in Agriculture Index <sup>1</sup>	S	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact		None
5 First Le	Inclusive Agricultural Sector Growth	4.5	9 nal Status.	Per capita expenditures (as a proxy for income) of USG targeted beneficiaries	R	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Average per capita expenditures (in USD) of sample b. Total population in zone of influence	Gendered Household Type: Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Male and Female Adults (M&F), Child No Adults (CNA)
6	Improved Nutritional Status Especially of Women and Children	3.1.9	11	Prevalence of stunted children under five years of age	R	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact	a. percent of children 0-59 months of age in the sample that is stunted b. total population of children 0-59 months of age in zone of influence	Sex: Male, Female
7	Improved Nutritional Status Especially of Women and Children	3.1.9	13	Prevalence of underweight women	RiA	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact	a. percent of women 15-49 years of age in the sample that is underweight b. total population of women 15-49 years of age in zone of influence	None

	nproved Agricultural Pro										
	Improved Agricultural Productivity	4.5	4	Gross margin per unit of land, kilogram, or animal of selected product (crops/animals selected varies by country)	RiA	FTF/F Indicators	Implementing Partners	annually	outcome	a. Hectares planted (for crops); Number of animals (for milk, eggs); or Area (ha) of ponds or Number of crates (for fish) b. Total Production c. Value of Sales (USD) d. Quantity of Sales e. Purchased input costs	Targeted commodity (type of cro type of animal, or type of fish freshwater of marine) Sex of farm Male, Fema
Sub-In	termediate Result 1.1:	Enhance	d Human	and Institutional Capaci	ity Development	for Increase	d Sustainable A	Agriculture	Sector Productiv	vity	
9	Enhanced Human and Institutional Capacity Development for Increased Agricultural Sector Productivity	4.5.2	5	Number of farmers and others who have applied new technologies or management practices as a result of USG assistance	RiA	FTF/F Indicators	Implementing Partners	annually	outcome	30	Duration: New, Continuing Sex: Male, Female
10	Enhanced Human and Institutional Capacity Development for Increased Agricultural Sector Productivity	4.5.2	28	Number of private enterprises (for profit), producers organizations, water users associations, women's groups, trade and business associations, and community-based organizations (CBOs) that applied new technologies or management practices as a result of USG assistance	RiA	FTF/F Indicators	Implementing Partners	annually	outcome		Type of organization (see indicato title for principal types) Duration: New, Continuing
1	Enhanced Human and Institutional Capacity Development for Increased Agricultural Sector Productivity	4.5.2	7	Number of individuals who have received USG supported short-term agricultural sector productivity or food security training	RiA	FTF/F Indicators	Implementing Partners	annually	output		Type of individual: Producers, People in government People in private sectifirms, Peop

12	Enhanced Human and Institutional Capacity Development for Increased Agricultural Sector Productivity	4.5.2	11	Number of food security private enterprises (for profit), producers organizations, water users associations, women's groups, trade and business associations, and community-based organizations (CBOs) receiving USG assistance	RiA	FTF/F Indicators	Implementing Partners	annually	output		in civil society Sex: Male, Female Type of organization (see indicator title for principal types) Duration: New, Continuing
Cub Int	oum odiata Dagult 1 2. l	Enhanas	d Taabnal		nination Manag	oment and l	[macyation				
Sub-Int	ermediate Result 1.2:	ыпапсе	u recinoi	ogy Development, Disser	mmation, Manag	ement, and i	nnovation				
13	Enhanced Technology Development, Dissemination, Management and Innovation	N/A		Percentage of farmers who used at least (a project-defined minimum number of) sustainable agriculture (crop/livestock and/or NRM) practices and/or technologies in the past 12 months	RiA	FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Percentage of farmers who used financial services (savings, agricultural credit, and/or agricultural insurance) in the past 12 months b. Total number of farmers living in the target geographic area	

14	Enhanced Technology Development, Dissemination, Management and Innovation	4.5.2	2	Number of hectares under improved technologies or management practices as a result of USG assistance	RiA	FTF/F Indicators	Implementing Partners	annually	outcome	Technology type: crop genetics (including nutritional enhancement), animal genetics, pest management, disease management, soil-related (fertility and conservation, including tillage), irrigation, water management,
										adaptation, fishing gear/techniqu e, other, total w/one or more improved technology Duration: New, Continuing Sex: Male, Female, Association- applied

Interm	ediate Result 2: Expa	nding Ma	rkets and	l Trade							
15	Expanding Markets and Trade	4.5.2	23	Value of incremental sales (collected at farm-level) attributed to USG implementation	RiA	FTF/F Indicators	Implementing Partners	annually	outcome	a. baseline sales (entered only once) b. reporting year sales (entered annually) c. volume of sales (mt)	Commodity
Sub-In	termediate Result 2.1	: improve	a Marke	t Efficiency							
16	Improved Market Efficiency	N/A		Percentage of farmers who used improved storage practices in the past 12 months	RiA	FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Percentage of farmers who used improved storage practices in the past 12 months b. Total number of farmers living in the target geographic area	
17	Improved Market Efficiency	4.5	10	Total increase in installed storage capacity (m³)	RiA	FTF/F Indicators	Implementing Partners	annually	output		Storage Type Dry, Cold
18	Improved Market Efficiency	4.5.1	17	Kilometers of roads improved or constructed	RiA	FTF/F Indicators	Implementing Partners	annually	output		Construction Type: Improved, Constructed (new)
19	Improved Market Efficiency	N/A		Number of market infrastructures rehabilitated and/or constructed	S	FFP Proposed <sup>2</sup>	Implementing Partners	annually	output		

Sub-In	termediate Result 2.2:	Improve	d Access t	o Business Development	and Sound and	Affordable F	inancial and R	isk Manage	ment Services		
20	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	N/A		Percentage of farmers who used financial services (savings, agricultural credit, and/or agricultural insurance) in the past 12 months	RiA	FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Percentage of farmers who used financial services (savings, agricultural credit, and/or agricultural insurance) in the past 12 months b. Total number of farmers living in the target geographic area.	
21	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	N/A		Percentage of farmers who practiced the value chain activities promoted by the project in the past 12 months	RiA	FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Percentage of farmers who practiced the value chain activities promoted by the project in the past 12 months b. Total number of farmers living in the target geographic area	
22	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	4.5.2	29	Value of Agricultural and Rural Loans	RiA	FTF/F Indicators	Implementing Partners	annually	output		Type of loan recipient: Producers, Local traders/assem blers, Wholesalers/p rocessors, Others. Sex of recipient: Male, Female, Joint, n/a
23	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	4.5.2	30	Number of MSMEs, including farmers, receiving USG assistance to access loans	S	FTF/F Indicators	Implementing Partners	annually	output		Size: Micro, Small, Medium Sex of owner: Male, Female, Joint, n/a

24	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	4.5.2	37	Number of MSMEs, including farmers, receiving business development services from USG assisted sources	S	FTF/F Indicators	Implementing Partners	annually	output	Size: Micro, Small, Medium MSME Type: Agricultural producer, Input supplier, Trader, Output processors, Non- agriculture, Other Sex of owner: Male, Female,
25	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	N/A		Number of MSMEs, including farmers, receiving USG assistance to access savings programs	S	FFP Proposed	Implementing Partners	annually	output	Joint, n/a
26	Improved Access to Business Development and Sound and Affordable Financial and Risk Management Services	N/A		Number of farmers who practiced the value chain activities promoted by the project in the past 12 months	RiA	FFP Proposed	Implementing Partners	annually	output	
Interme	ediate Result 3: Increas	sed Inves	tments in	Agriculture and Nutriti	on-Related Activ	ities	•		<u>,                                      </u>	
27	Increased Investment in Agriculture and Nutrition-related Activities	4.5.2	12	Number of public-private partnerships formed as a result of USG assistance	S	FTF/F Indicators	Implementing Partners	annually	output	Partnership Focus: Agriculture production, Agriculture post-harvest transformatio n, Nutrition, Multi-focus, Other

28	Increased Resilience of Vulnerable Communities and Households	4.7	3	Prevalence of households with moderate or severe hunger	R	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	impact	a. percent of households in sample with moderate to severe hunger b. total population of households in zone of influence	Gendered Household Type: Adult Female no Adult Male (FNM), Adu Male no Adu Female (MNF), Male and Female Adults
29	Increased Resilience of Vulnerable Communities and Households	N/A		Average Household Dietary Score (HDDS)	R	FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome		(M&F), Chil No Adults (CNA)
30	Increased Resilience of Vulnerable Communities and Households	N/A		Number of communities with disaster early warning and response (EWR) systems in place and working effectively	RiA	FFP Proposed	Implementing Partners	annually	outcome		
31	Increased Resilience of Vulnerable Communities and Households	5.2.1	2	Number of people trained in disaster preparedness as a result of USG assistance	RiA	F Indicators	Implementing Partners	annually	output		
32	Increased Resilience of Vulnerable Communities and Households	3.3.3	9	Number of people benefiting from USG- supported social assistance programming	RiA	F Indicators	Implementing Partners	annually	output		

33	Increased Resilience of Vulnerable Communities and Households	3.3.3	15	Number of USG social assistance beneficiaries participating in productive safety nets	RiA	FTF/F Indicators	Implementing Partners	annually	output	Type of Asset strengthened : Community assets, Human assets/capita l, Household assets Duration: New, Continuing Sex: Male, Female
34	Increased resilience of vulnerable communities and households	4.5.2	14	Number of vulnerable households benefiting directly from USG interventions	S	FTF/F Indicators	Implementing Partners	annually	output	Duration: New, Continuing Gendered Household Type: Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Male and Female Adults (M&F), Child No Adults (CNA)

Intermo	ediate Result 5: Impro	ved Acces	ss to Dive	rse and Quality Foods							
35	Improved Access to Diverse and Quality Foods	3.1.9.1	1	Prevalence of children 6- 23 months receiving a minimum acceptable diet	RiA (MCHN)	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. percent of children 6-23 months in sample receiving a minimum acceptable diet b. total population of children 6-23 months in zone of influence	Sex: Male, Female
36	Improved Access to Diverse and Quality Foods	3.1.9.1	1	Prevalence of children 6- 23 months receiving a minimum acceptable diet	RiA (MCHN)	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	Implementing Partners	annually	outcome		
37	Improved Access to Diverse and Quality Foods	3.1.9.1	2	Women's Dietary Diversity: Mean number of food groups consumed by women of reproductive age	RiA	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Mean number of food groups consumed by women 15-49 years in the sample b. Total population of women of reproductive age (15-49 years) in zone of influence	
Intermo	ediate Result 6: Impro	ved Nutri	ition-Rela	ted Behaviors		•					
38	Improved Nutrition- Related Behaviors	3.1.9.1	4	Prevalence of exclusive breastfeeding of children under six months of age	RiA (MCHN)	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. percent of children 0-5 months of age in sample who are exclusively breast fed b. total population of children 0-5 months of age in zone of influence	Sex: Male, Female

39	Improved Nutrition- Related Behaviors	3.1.9.1	4	Prevalence of exclusive breastfeeding of children under six months of age	RiA (MCHN)	FTF/F Indicators FFP Baseline and Final Evaluation Indicators	Implementing Partners	annually	outcome		Sex: Male, Female
40	Improved Nutrition- Related Behaviors	3.1.8	33	Percentage of children under age five who had diarrhea in the prior two weeks	RiA (MCHN)	F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Percentage of children 0-59 months of age who had diarrhea in the prior two weeks b. Total population of children 0-59 months of age in target geographic area	
41	Improved Nutrition- Related Behaviors	3.1.8	33	Percentage of children under age five who had diarrhea in the prior two weeks	S	F Indicators FFP Baseline and Final Evaluation Indicators	Implementing Partners	annually	outcome		
42	Improved Nutrition- Related Behaviors	3.1.6.7	1	Percent of children under five years old with diarrhea treated with Oral Rehydration Therapy (ORT)	RiA (MCHN)	F Indicators FFP Baseline and Final Evaluation Indicators	M&E Contractor	baseline and final evaluation	outcome	a. Percent of children 0-59 months of age with diarrhea treated with Oral Rehydration Therapy (ORT) b. Total population of children 0-59 months of age with diarrhea in target geographic area	

43	T 137 / '/'	3.1.6.7	1	D / C 1.11 1	S	F	Y 1 4'	11

	Related Deliaviors					Proposed	railleis				
				of children born in the							
				last 24 months who were							
				put to the breast within							

			one hour of birth)						
48	Improved Nutrition- Related Behaviors	N/A	Number/percent of carers who reported adding a multiple micronutrient product to child's complementary food (children aged 6-23 months)	S	FFP Proposed	Implementing Partners	annually	outcome	
49	Improved Nutrition- Related Behaviors	3.1.6.8	Percent of households in target areas practicing correct use of recommended household water treatment technologies	S	F Indicators	Implementing Partners	annually	outcome	
50	Improved Nutrition- Related Behaviors	N/A	Percent/number of villages in catchment area that have functioning water systems	S	FFP Proposed	Implementing Partners	annually	outcome	
51	Improved Nutrition- Related Behaviors	N/A	Percent/number of villages in catchment area that hold to regular maintenance schedules for water facilities	S	FFP Proposed	Implementing Partners	annually	outcome	
52	Improved Nutrition- Related Behaviors	N/A	Percent/number of villages in catchment area that hold to regular maintenance schedules for sanitation facilities	S	FFP Proposed	Implementing Partners	annually	outcome	
53	Improved Nutrition- Related Behaviors	3.1.6.8	Percent of population in target areas practicing open defecation	S	F Indicators	Implementing Partners	annually	outcome	
54	Improved Nutrition- Related Behaviors	N/A	Percentage of respondents who know all critical moments for	S	FFP Proposed	Implementing Partners	annually	outcome	

				handwashing							
55	Improved Nutrition- Related Behaviors	3.1.8.1	2	Number of people gaining access to an improved drinking water source	RiA	F Indicators	Implementing Partners	annually	output		
56	Improved Nutrition- Related Behaviors	3.1.8.2	2	Number of people gaining access to an improved sanitation facility	RiA	F Indicators	Implementing Partners	annually	output		
57	Improved Nutrition- Related Behaviors	N/A		Number of persons per latrine	S	FFP Proposed	Implementing Partners	annually	outcome		
58	Improved Nutrition- Related Behaviors	3.1.8.2	3	Number of improved toilets provided in institutional settings	S	F Indicators	Implementing Partners	annually	output		
59	Improved Nutrition- Related Behaviors	3.1.6.8	5	Number of communities certified as "open defecation free" (ODF) as a result of USG assistance	S	F Indicators	Implementing Partners	annually	output		
Intern	ıediate Result 7: Impro	ved Use	of Matern	al and Child Health and	Nutrition Serv	ices				<b> _</b>	
60	Improved Utilization of Maternal and Child Health and Nutrition Services			Number/percent of cases of acute malnutrition in children under five (6-59 months) detected and referred for treatment	S	FFP Proposed	Implementing Partners	annually	outcome		
61	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Percent of pregnant and lactating women taking iron supplements in the last 7 days	S	FFP Proposed	Implementing Partners	annually	outcome		
62	Improved Use of Maternal and Child Health and Nutrition Services	3.1.6.1	2	Percent of Births receiving at least 4 antenatal care (ANC) visits during pregnancy	S	F Indicators	Implementing Partners	annually	outcome		

63	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Percent of children 12-23 months who are fully immunized	S	FFP Proposed	Implementing Partners	annually	outcome	
64	Improved Use of Maternal and Child Health and Nutrition Services	3.1.3.2	6	Proportion of children under 5 years old who slept under an insecticide-treated net (ITN) the previous night	S	F Indicators	Implementing Partners	annually	outcome	
65	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Number/percent participation of under 2s in community-based growth promotion	S	FFP Proposed	Implementing Partners	annually	output/outcome	
66	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Number/percent women receiving postpartum family planning counseling	S	FFP Proposed	Implementing Partners	annually	output/outcome	
67	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Client-CHW ratio	S	FFP Proposed	Implementing Partners	annually	output	
68	Improved Use of Maternal and Child Health and Nutrition Services	3.1.9	1	Number of people trained in child health and nutrition through USG- supported programs	RiA	FTF/F Indicators	Implementing Partners	annually	output	Sex: Male, Female
69	Improved Use of Maternal and Child Health and Nutrition Services	3.1.9	15	Number of children under five reached by USG-supported nutrition programs	RiA	FTF/F Indicators	Implementing Partners	annually	output	Sex: Male, Female
70	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Number of mothers who received a high-dose vitamin A supplement before their infant reached 6 weeks of age	S	FFP Proposed	Implementing Partners	annually	output	

71	Improved Use of Maternal and Child Health and Nutrition Services	3.1.9.2	3	Number of children under five years of age who received vitamin A from USG-supported programs	S	FTF/F Indicators	Implementing Partners	annually	output	Location: Urban, Rural Sex: Male, Female
73	Improved Use of Maternal and Child Health and Nutrition Services	N/A		Number of insecticide treated bed-nets distributed	S	FFP Proposed	Implementing Partners	annually	output	
74	Improved Use of Maternal and Child Health and Nutrition Services	3.1.7.1	4	Number of additional USG-assisted community health workers (CHWs) providing family planning (FP) information and/or services during the year	S	F Indicators	Implementing Partners	annually	output	
Cross-C	utting/Gender		•		1		•	1		
75	Cross-Cutting/Gender	GNDR	3	Proportion of females who report increased self-efficacy at the conclusion of USG supported training/programming	RiA	F Indicators	M&E Contractor	baseline and final evaluation	outcome	
76	Cross-Cutting/Gender	GNDR	4	Proportion of target population reporting increased agreement with the concept that males and females should have equal access to social, economic, and political opportunities	RiA	F Indicators	M&E Contractor	baseline and final evaluation	outcome	
77	Cross-Cutting/Gender	GNDR	7	Percentage of target population that views Gender-Based Violence (GBV) as less acceptable after participating in or being exposed to USG	RiA	F Indicators	M&E Contractor	baseline and final evaluation	outcome	

				programming						
78	Cross-Cutting/Gender	GNDR	2	Proportion of female participants in USG- assisted programs designed to increase access to productive economic resources (assets, credit, income or employment)	R	F Indicators	Implementing Partners	annually	output	
current pro		y of FFP p	rograms.	ot be collected in the le range of indicators from ot Sources, please contact FFP.		ng indicators d	eveloped by other	multilateral		

Key: Indicators classified as R (required/mandatory) are required for all development programs.

Indicators classified as RiA (required if applicable) are required for all development programs that have interventions in that given program area.

Indicators classified as RiA (MCHN) are required for all development programs with maternal-child health and nutrition activities.

Indicators classified as S (standard) are optional, but if program plans to collect data in that area, it is recommended to use the standard indicator.

## List of Gender Indicators for Title II development food assistance programs

# Gende	Program Objective/Result	Indicator Title	R - required/ mandatory RiA - required if applicable S - standard	Source	Who collects?	Frequency of collection?	Indicator Type	Disaggregation
Ieasu	Improved access to and control over: assets/resources income (own	Ownership of assets Percentage of men and women owning productive capital (e.g., livestock, poultry, farm equipment) <sup>2</sup>	S S	FFP Proposed [Women's Empowerment in Agriculture Index (WEAI) Module G3] <sup>1</sup>	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
	and household)	Purchase, sale, or transfer of assets  Percentage of men and women reporting the ability to dispose of productive capital (e.g., livestock, poultry, farm equipment) <sup>2</sup>	S	FFP Proposed [WEAI Module G3]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
		Access to and control over credit  Percentage of men and women with access to credit <sup>2</sup>	S	FFP Proposed [WEAI Module G3]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female

4		Access to and control over credit  Percentage of men and women reporting control over credit <sup>2</sup>	S	FFP Proposed [WEAI Module G3]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
5		Access to income Percentage of men and women that earn cash	S	FFP Proposed [Demographic and Health Surveys (DHS)]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
6		Access to income Percentage of women reporting their earnings to be about the same as that of their husband/partner	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
7		Control over income Percentage of men and women reporting control over use of own income	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
8		Control over income Percentage of men and women reporting control over use of household income	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
9	Improved access to risk and early warning information	Percentage of men and women reporting receiving risk and early warning information from source (e.g., media, peer to peer) <sup>3</sup>	S	FFP Proposed [Needs to be validated]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
10	Improved couple communication on disaster risk reduction or evacuation plans	Percentage of men and women reporting having discussed evacuation plan with spouse <sup>3</sup>	S	FFP Proposed [Needs to be validated]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female

11	Improved household decision- making power among women	Percentage of women who report making household decisions <sup>4</sup>	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Female
Meas	rement Area 3:	Male Involvement and Share	d Responsibility			I	1	I.
12	Improved knowledge of optimal maternal and young child	Percentage of men that have knowledge of optimal maternal and young child health and nutrition behaviors	S	FFP Proposed [LINKAGES project surveys]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male
13	health and nutrition behaviors <sup>5</sup> among men	Percentage of men with knowledge of what they can do to support their spouse/partner to practice optimal maternal and young child health and nutrition behaviors	S	FFP Proposed [LINKAGES project surveys]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male
14		Percentage of men and women reporting that they have communicated with their spouse at least once in the past 12 months on optimal maternal and young child health and nutrition behaviors <sup>3</sup>	S	FFP Proposed [adaptation of DHS, needs to be validated]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
15	Improved support by men to implement optimal maternal and young child health and nutrition behaviors <sup>5</sup>	Percentage of men accompanying their partner to an antenatal care visit	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male

men in antenatal care and children's health visits	accompanying their partner to a child health visit <sup>3</sup>		[adaptation of DHS, needs to be validated]	Contractor	Evaluation		
Increased leisure time among women (proxy for improved participation by men in child care and household chores)	Percentage of men and women reporting having leisure time (0, 1–2, 3–4, 5+ hours per day) <sup>3</sup>	S	FFP Proposed [Needs to be validated]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
Joint health- seeking decisions among couples around	Percentage of men and women reporting that they make joint decisions around the health of women	S	FFP Proposed [DHS, IMAGES survey]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
maternal and child health and nutrition	Percentage of men and women reporting that they make joint decisions around the health of their child	S	FFP Proposed [DHS, IMAGES survey]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
rement Area 4:	Mobility		l	1		II.	1
Improved physical mobility among women	Percentage of women reporting going to the market on their own <sup>6</sup>	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Female

21	Improved gender-related norms and attitudes	Percentage of men and women agreeing completely with selected statements about gender norms and roles	S	FFP Proposed [WS31 in the DHS Women's Status Module] OR [Domestic Chores and Daily Life Sub-Scale of Gender Equitable Scale (GEM)]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
22		Proportion of target population reporting increased agreement with the concept that males and females should have equal access to social, economic, and political opportunities	RiA	F indicator	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
23	Lower acceptance of gender-based violence (GBV)	Proportion of target population reporting increased agreement with the concept that males and females should have equal access to social, economic, and political opportunities	RiA	F indicator	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
24		Percentage of target population that views GBV as less acceptable after participating in or being exposed to USG programming	RiA	F indicator	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
25	Reduced levels of GBV	Percentage of women and men that have experienced physical/emotional/sexual violence by current spouse/partner	S	FFP Proposed [DHS Domestic Violence Module]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Male, Female
	Descriptors: The	e following indicators are impler perspective.	ortant to provid	e a more complete pict	ure of the cont	ext in which the Title I	I developme	nt food aid program is
26	Increase in age of marriage	Age at first marriage	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Female

27	Delayed first pregnancy	Median age at first birth for women 15–49, according to current age	S	FFP Proposed [DHS]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Female
28	Improved self- efficacy among women	Mean perceived self-efficacy score	S	FFP Proposed [Judge TT et al, 1998]	M&E Contractor	Baseline and Final Evaluation	Outcome	Sex: Female
29		Proportion of females that report increased self-efficacy at the conclusion of USG- supported training/programming	RiA	F Indicator	Implementin g Partner	Annually	Outcome	Sex: Female
30	Cross- Cutting/Gender	Proportion of female participants in USG-assisted programs designed to increase access to productive economic resources (assets, credit, income, or employment)	R	F Indicator	Implementin g Partner	Annually	Output	Sex: Female

<sup>&</sup>lt;sup>1</sup>The Women's Empowerment In Agriculture Index (WEAI) is still under discussion by USAID/FFP and will not be collected in the current program year by the majority of USAID/FFP programs.

**Key:** "FFP Proposed" indicators were based on a review of a wide range of indicators from other sources, including primarily the Demographic and Health Surveys (DHS) and other implementing organizations. For a full list of sources, please contact USAID/FFP.

Indicators classified as R (required/mandatory) are required for all development programs.

Indicators classified as RiA (required if applicable) are required for all development programs that have interventions in that given program area.

Indicators classified as S (standard) are optional, but if program plans to collect data in that area, it is recommended to use the standard indicator.

<sup>&</sup>lt;sup>2</sup>This FFP proposed indicator is a sub-index/scale of WEAI, and will require validation to be used as a sub-scale before it can be adopted.

<sup>&</sup>lt;sup>3</sup>This FFP proposed indicator will require validation.

<sup>&</sup>lt;sup>4</sup>The battery of questions will include decisions around women's health, child's health, women's income, major household purchases, daily household needs, and visits to family or relatives.

<sup>&</sup>lt;sup>5</sup>These behaviors include early initiation of breastfeeding, exclusive breastfeeding among children under 6 months, continued breastfeeding at 1 year, introduction of complementary foods at 6–9 months, feeding during illness, and more rest during pregnancy.

<sup>&</sup>lt;sup>6</sup> Women's Status Module asks about six different places including the market; of the six places, the market is probably furthest from women's places of residence.

## List of Environmental Indicators for Title II development food assistance programs
