# GOVERNMENT OF BANGLADESH

- Proposing a standard model for conducting Community Risk Assessments as a critical step towards the provision of information to inform “Local Disaster Action Plans” through the Standing Orders on Disasters and referred to in the Disaster Management Act.

**USAID**  
আমেরিকার জনগণের গর্ব থেকে

# ADVANTAGE OF THE MODEL

- Standardizes the process of Community Risk Assessments to inform Local Disaster Action Plans;
- CDMP has developed a high level of expertise which they are able to provide in support of these CRAs.
- Primary and secondary stakeholders to engage in CRAs are clearly defined.

**USAID**  
আমেরিকার জনগণের পক্ষ থেকে

# CHALLENGES TO THE MODEL

- Access to secondary information for the Maps, long term trends requires access to multiple sources of information at the government level.
- Inclusivity limited
- Large Time & Resource Requirement
- Multiple focus identified risks which require national level buy-in or buy-in and funding

**USAID**  
আমেরিকার জনগণের পক্ষ থেকে

# PROSHAR SOLUTIONS

- Subsidize access at the ward level for secondary informational maps
- Identify representatives at the community level that have the local knowledge to understand risks by a wider range of representatives.

**USAID**  
আমেরিকার জনগণের পক্ষ থেকে

## PROSHAR SOLUTIONS (2)

- Reduce the number of activities required under the CRA .
- Reduce the # of hours expected and/or amount in return for a commitment and actual participation per participant
-
