

# Measuring Poverty with the PPI

TOPS / FSN Network Knowledge  
Sharing Meeting

Grameen Foundation

Julie Peachey

January 28, 2016

# Session Agenda

---

- Welcome and Session Objectives
- Introductions
- History and Overview of the PPI
- PPI Use Cases and Examples
- Small Group Reflection
- Q&A / Discussion

# Objectives

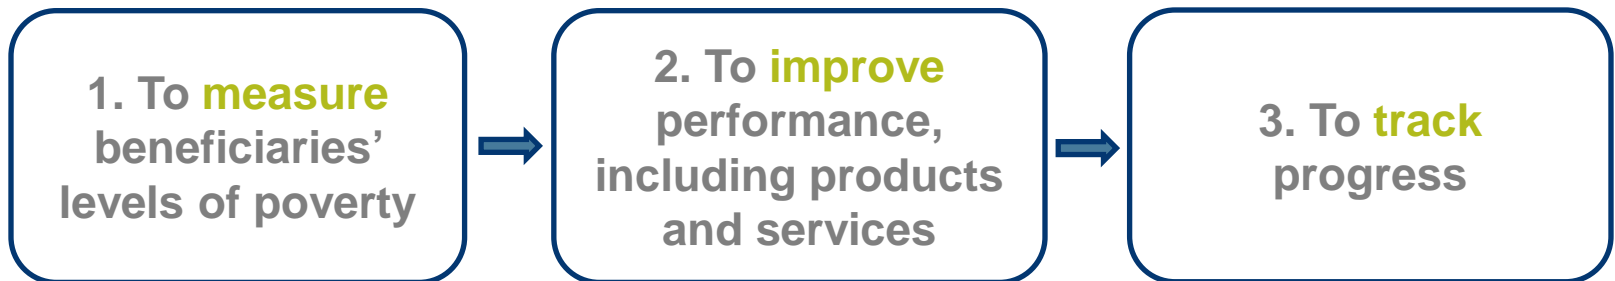

- 1) Create awareness and interest in the PPI
- 2) Develop participants' understanding of how the PPI works and its advantages
- 3) Brainstorm how food security projects could benefit from incorporating the PPI into M&E frameworks

# Overview of the PPI

# Lifting People Out of Poverty Requires Measuring Poverty

- ▶ Lifting people out of poverty requires knowing who is actually poor
- ▶ Our global goals for sustainable development require a robust understanding of where and how the poorest of society live
- ▶ If you want to be accountable to a mission that reaches the poor, the PPI is a widely-available, low-cost, transparent tool to do that, across three dimensions:

# What is the PPI?

- A statistically rigorous yet easy-to-administer poverty measurement tool
- Statistical methodology designed and conducted by [Mark Schreiner](#) of Microfinance Risk Management, L.L.C.
- 10 questions and a scoring system
- Provides likelihood that the survey respondent's household is living below poverty line
- Calibrated to national and international poverty lines
- Public good, available for download at [www.progressoutofpoverty.org](http://www.progressoutofpoverty.org)

## Progress out of Poverty Index® (PPI®) for Colombia

Indicator	Value	Points
1. How many household members are 18-years-old or younger?	A. Four or more	0
	B. Three	5
	C. Two	11
	D. One	17
	E. None	23
2. What is the highest educational level reached by the female head/spouse?	A. None, or pre-school	0
	B. Primary or middle school	3
	C. High school	6
	D. No female head/spouse	8
	E. Post-secondary or college (1 to 4 years)	9
	F. Post-secondary or college (5 years or more)	17
3. How many household members spent most of the past week working?	A. None	0
	B. One	9
	C. Two or more	14

PPI Score	USAID Extreme (%)	\$1.25 2005 PPP (%)	\$2.50 2005 PPP (%)	\$3.75 2005 PPP (%)	\$5.00 2005 PPP (%)
0-4	100.0	81.1	100.0	100.0	100.0

Watch an [introduction to the PPI](#) here

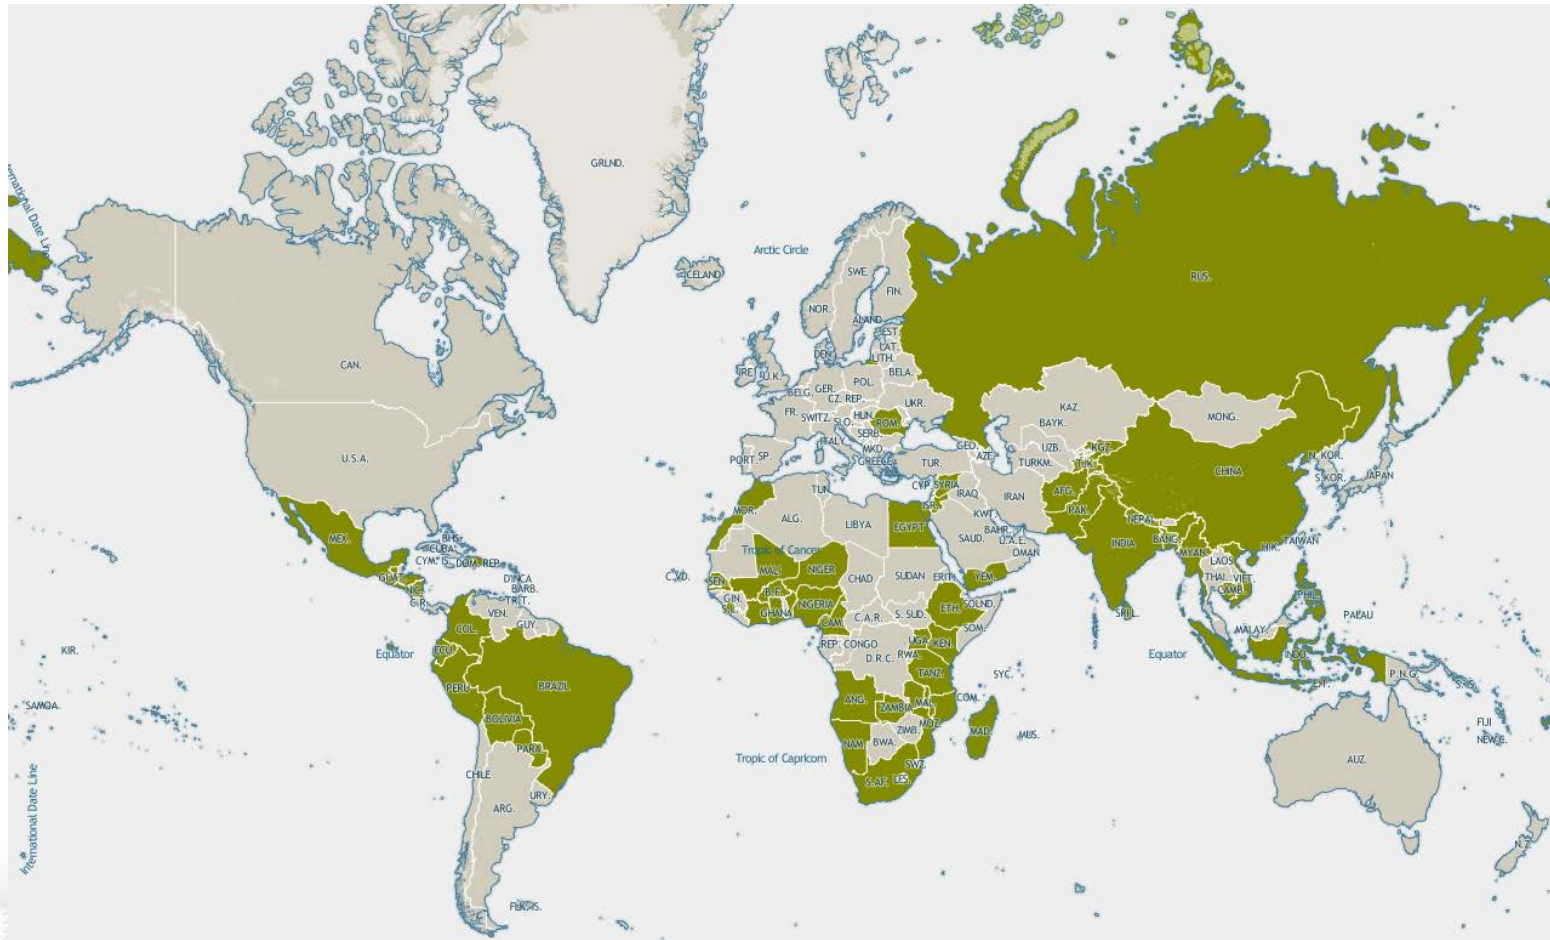

# PPI Has Been Developed Over 10 Years

- ▶ In 2005, Grameen Foundation commissioned the development of the Progress out of Poverty Index® (PPI®) with the support of the Consultative Group to Assist the Poor (CGAP) and Ford Foundation.
- ▶ The goal was to create an easy-to-use poverty measurement tool for microfinance institutions, understanding that these institutions need reliable poverty data to manage their social performance.
- ▶ Mark Schreiner's simple poverty scorecard resonated with Grameen Foundation because of the characteristics it shares with the Grameen Bank's 10 Indicators for evaluating the poverty level of its borrowers.

# The PPI's Global Reach Covers 90% of the World's Poor

- Available in 60 countries, covering >90% of the world's population living below \$1.25/day
- PPI's website attracts 24,000 visitors annually with 1,000 document downloads per month

# The PPI has Become a Global Standard for Development

More than 400 organizations and companies in development use the PPI for measuring poverty.

It has been incorporated into many impact investing and sector-specific measurement frameworks.

# PPI Documents Include Multiple Components

Indicators	Responses	Score
1. How many members does the household have?	A. Five or more	0
	B. Four	5
	C. Three	14
	D. Two	20
2. In the past calendar week, did the male headspouse work for at least one hour?	A. No	0
	B. No male headspouse	2
	C. Yes	10
3. What is the mother tongue of the female headspouse?	A. Something other than Spanish	0
	B. Spanish	6
	C. No female headspouse	10
4. How many rooms does the household occupy, not counting bedrooms, kitchens, laundry rooms, garages, storage rooms, or rooms used for business?	A. One or two	0
	B. Three	2
	C. Four	5
	D. Five or more	7
5. What is the main construction material of the floors of the residence?	A. Dirt, or other	0
	B. Bricks, or cement	5
	C. Wood planks, hardwood floors or parquet, tile mosaic, stone, or ceramic, or trap of carpet	11
	D. Other	3
6. What type of toilet arrangement do the members of the household usually use?	A. Nonsubsidized	0
	B. Open-pit latrine (no solid floor, latrine with solid floor, composting toilet, flush toilet or flush latrine, or other	4
	C. Firewood, dungmanure, sawdust, kerosene, or other	7
	D. LPG from a cylinder	12
7. What is the main fuel or energy source used for cooking?	A. Firewood, dungmanure, sawdust, kerosene, or other	0
	B. LPG from a cylinder	12
	C. Kerosene, natural gas, electricity, or does not cook	12
	D. Other	12
8. Does the household own, possess, or have the use of a refrigerator or freezer?	A. No	0
	B. Yes	7
	C. Yes	7
9. Does the household own, possess, or have the use of a television?	A. No	0
	B. Yes	5
	C. Yes	5
10. Does the household own, possess, or have the use of a motorcycle (for its personal use) or an automobile (for its personal use)?	A. No	0
	B. Yes	6
	C. Yes	6
<b>Total Score:</b>		<b>39</b>

## 10-question PPI scorecard

## Look-Up Table

Ghana 2012 PPI Interpretation of Indicators

## Ghana 2012 PPI Interpretation of Indicators

This short guide provides guidance on administering the Ghana PPI and highlights the most important definitions from the enumerator manual from Ghana Statistical Service (2012) "Interviewer's Manual: Ghana Living Standards Survey 6", [the Manual] and Ghana Statistical Service (2012) "Household Questionnaire, Parts A and B: Ghana Living Standards Survey 6", [the Questionnaire]. Suggestions are drawn from the experiences and challenges faced during field testing conducted in Ghana in January and February 2015.

### General advice for conducting the interview

When an issue arises that is not addressed here, its resolution should be left to the unaided judgment of the enumerator, as that apparently was the practice in Ghana's 2012/13 Living Standards Survey. That is, an organization using the PPI should not promulgate any definitions or rules (other than those in these "Guidelines") to be used by all its field agents. Anything not explicitly addressed in these "Guidelines" is to be left to the unaided judgment of the individual enumerator.

Fill out the scorecard header and the "Back-page Worksheet" first, following the directions on the "Back-page Worksheet". In particular, do not ask the first two scorecard indicators directly. Instead, use the information recorded on the "Back-page Worksheet" to determine the proper responses for the first two indicators.

## Guide to interpreting indicators

First Name	Age	How many months of the past 12 has <name> been away?	Is <name> a household member? (apply rules)	If <name> is a household member 5- and 17-years-old, is he/she currently in school?			
1.			No	Yes	Not 5-17 or not member	No	Yes
2.			No	Yes	Not 5-17 or not member	No	Yes
3.			No	Yes	Not 5-17 or not member	No	Yes
4.			No	Yes	Not 5-17 or not member	No	Yes
5.			No	Yes	Not 5-17 or not member	No	Yes
6.			No	Yes	Not 5-17 or not member	No	Yes
7.			No	Yes	Not 5-17 or not member	No	Yes
8.			No	Yes	Not 5-17 or not member	No	Yes
9.			No	Yes	Not 5-17 or not member	No	Yes
10.			No	Yes	Not 5-17 or not member	No	Yes
11.			No	Yes	Not 5-17 or not member	No	Yes
12.			No	Yes	Not 5-17 or not member	No	Yes
13.			No	Yes	Not 5-17 or not member	No	Yes
14.			No	Yes	Not 5-17 or not member	No	Yes
<b># Members:</b>			<b># "Yes"</b>				

## Back-Page Worksheet

Figure 2 (Myanmar): Poverty lines, and poverty rates at the household-level and person-level by urban, rural, and all

Region	Line/rate	Poverty lines and poverty rates (%)

## Design Documentation

Documents published on PPI country page - <http://progressoutofpoverty.org/country>

# Using the PPI Scorecard

Indicators

Client Response

Points

Indicator	Possible response	Points	Total
1. How many people aged 0 to 17 are in the household?	Five or more	0	8
	Four	4	
	Three	8	
	Two	13	
	One	20	
2. What is the household's principal occupation?	None	27	0
	A. Labourers (agricultural, plantation, other farm), hunters, tobacco preparers and tobacco product makers, and other labourers	0	
	B. Others	8	
	C. Professionals, technicians, clerks, administrators, managers, executives, directors, supervisors, and teachers	14	

# Using the PPI: PPI Scorecard

Indicator	Possible response	Points	Total
1. How many people aged 0 to 17 are in the household?	Five or more	0	8
	Four	4	
	Three	8	
	Two	13	
	One	20	
2. What is the household's principal occupation?	None	27	0
	A. Labourers (agricultural, plantation, other farm), hunters, tobacco preparers and tobacco product makers, and other labourers	0	
	B. Others	8	
	C. Professionals, technicians, clerks, administrators, managers, executives, directors, supervisors, and teachers	14	
3. Is the residence all pucca (burnt bricks, stone, cement, concrete, jackboard/cement-plastered reeds, timber, tiles, galvanised tin or asbestos cement sheets)?	A. No	0	4
	B. Yes	4	
4. What is the household's primary source of energy for cooking?	A. Firewood and chips, charcoal, or none	0	5
	B. Others	5	
	C. LPG	17	
5. Does the household own a television?	A. No	0	6
	B. Yes	6	
6. Does the household own a bicycle, scooter, or motor cycle?	A. No	0	0
	B. Yes	5	
7. Does the household own a <i>almirah</i> /dressing table?	A. No	0	3
	B. Yes	3	
8. Does the household own a sewing machine?	A. No	0	0
	B. Yes	6	
9. How many pressure cookers or pressure pans does the household own?	A. None	0	0
	B. One	5	
	C. Two or more	9	
10. How many electric fans does the household own?	A. None	0	5
	B. One	5	
	C. Two or more	9	
		Total:	31

# Using the PPI: Look-up Table

PPI Score	Total Below National Poverty Line
0-4	99.3%
5-9	92.5%
10-14	91.9%
15-19	93.4%
20-24	77.6%
25-29	76.8%
30-34	77.8%
35-39	48.6%
40-44	48.3%
45-49	33.6%
50-54	34.4%
55-59	22.6%
60-64	10.1%
65-69	10.1%
70-74	6.9%
75-79	3.8%
80-84	2.1%
85-89	0.0%
90-94	0.0%
95-100	0.0%

Estimating a household's poverty likelihood:

With a score of 31, a household has a 77.8% likelihood of falling below the national poverty line.

# Calculating a Group's Poverty Rate

Client ID	Poverty Likelihood
Household 1	39%
Household 2	48%
Household 3	23%
Household 4	55%
Household 5	21%
Household 6	44%
Household 7	63%
Household 8	12%
Household 9	22%
Household 10	48%
<b>Group Poverty Rate</b>	<b>38%</b>

Average of poverty likelihoods of all ten households

Individual poverty likelihoods of surveyed households are averaged to obtain the group's poverty rate. Watch how to [calculate poverty rates using the PPI](#) here.

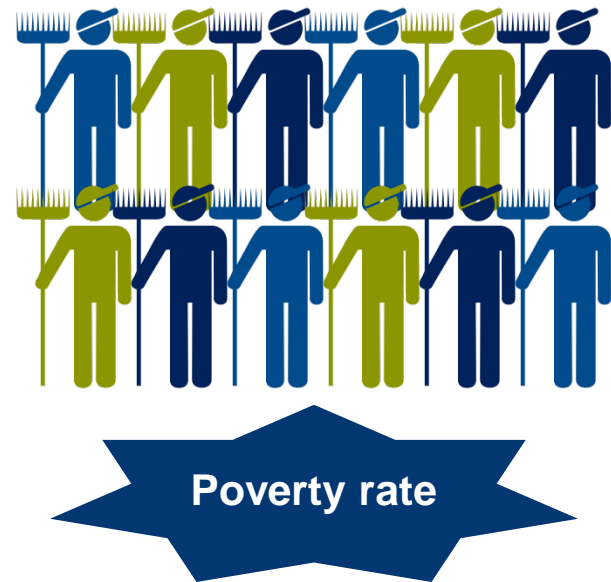

# Interpreting the PPI

n=1 (household)      PPI Score = 31  
Poverty Likelihood = 77.8%

- ▶ There is a 77.8% likelihood (or probability) that the household falls below the national poverty line.

n=1000 (group)      PPI Scores = Vary  
Avg. of Poverty Likelihoods = 66.3%

- ▶ In this group, 663 households live below the national poverty line.

# Free Learning Resources

PPI Trainer Toolkit

Case Studies and Reports

Studies on how various organizations have used the PPI

# What other options for poverty measurement exist?

- Average loan size, as proxy [microfinance]
- Bespoke tool by organization or government department
- World Bank **Proxy Means Tests**
- Oxford's **Multidimensional Poverty Index**
  - “An international measure of acute poverty covering over 100 developing countries. It complements traditional income-based poverty measures by capturing the severe deprivations that each person faces at the same time with respect to education, health and living standards.”
- **Wealth Index Quintiles – new Equity Tool**
  - A twenty-question client interview that uses asset/household indicators from DHS surveys to place clients in a wealth quintile distribution.
- **USAID Poverty Assessment Tool [PAT]**
  - “A 10-25 question, country-specific household survey—administered in twenty minutes or less—and a data entry template. Using such a tool, an implementing partner can gain an accurate estimate of the share of its beneficiaries who are very poor.”
- **Fundacion Paraguaya Poverty Stoplight**
  - “A visual survey which uses a series of photographs, families self-assess their level of poverty in 50 indicators grouped into 6 dimensions of poverty. Each indicator is defined as Red (extreme poverty), Yellow (poverty) or Green (not poverty).”

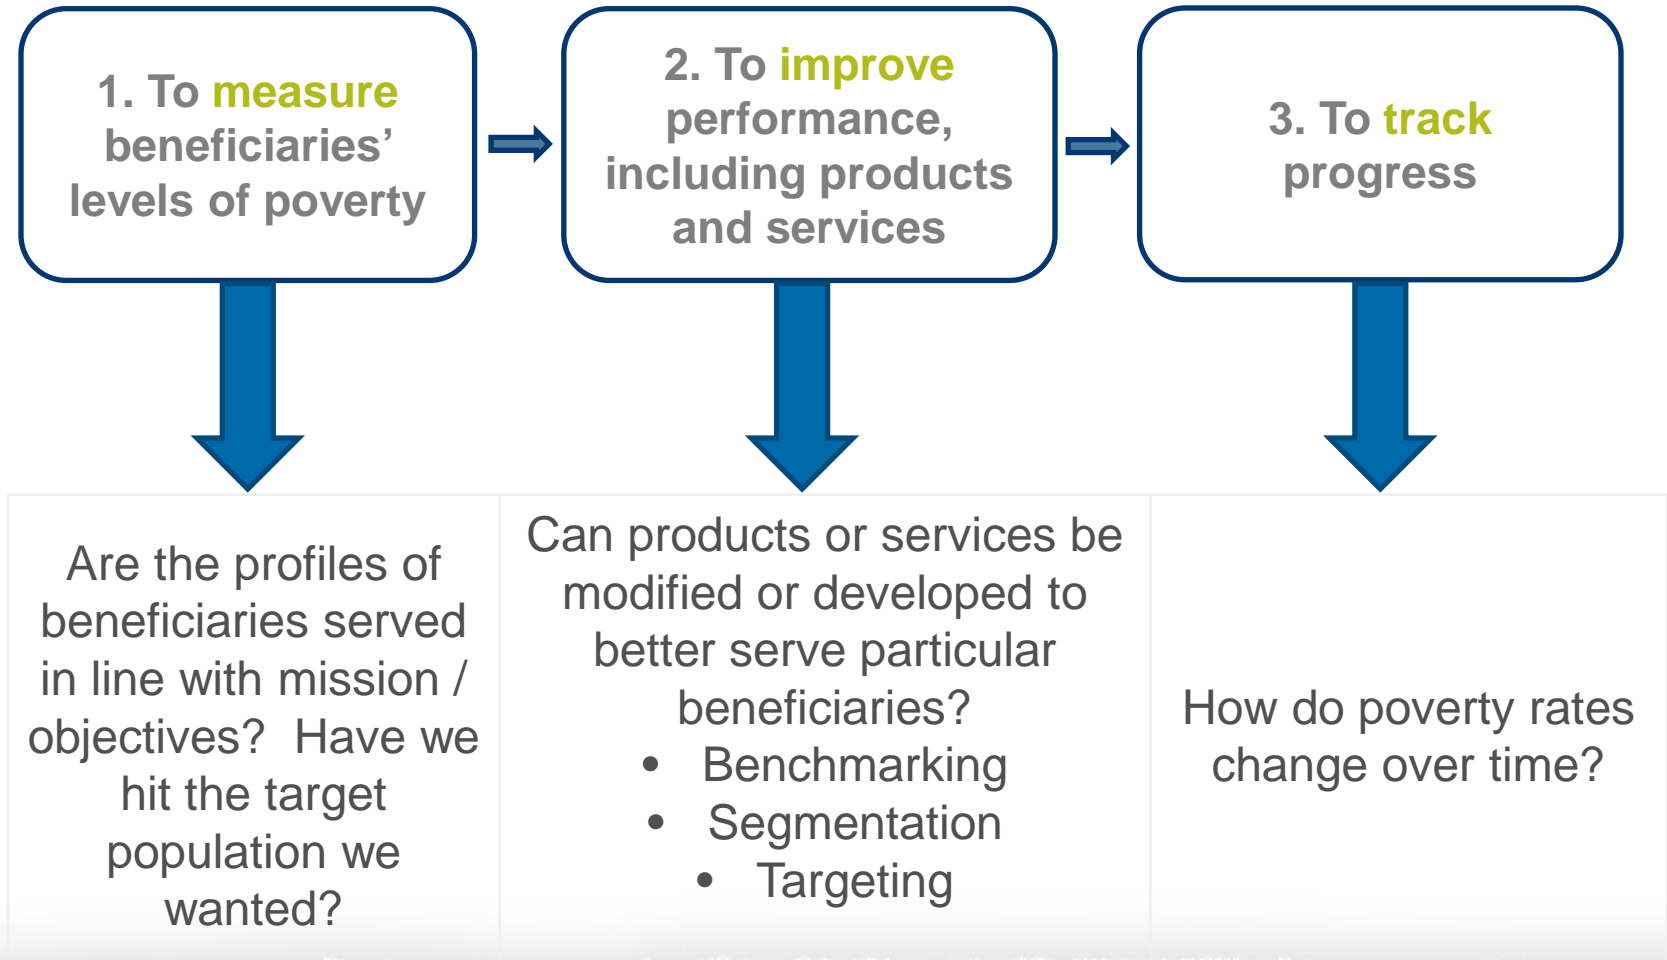

# Advantages of the PPI

- ✓ Objective
- ✓ Simple and cost-effective
- ✓ Consumption-based approach [widely accepted]
- ✓ Country-specific, based on national survey data
- ✓ Results specific to people being served
- ✓ Results expressed in terms of multiple poverty lines – national and international
- ✓ Comparable results
- ✓ Accuracy/precision is known
- ✓ Thoroughly documented; fully transparent
- ✓ Can be used to measure change over time

# Examples of PPI Use

# Three Primary PPI Use Cases

# Measuring / Validating Poverty Outreach

**% Pride MDI clients likely to be below selected poverty lines across pilot branches**

Less than 2% of the organization's clients were below the National Poverty Line.

They had a target of reaching 20% below NPL.

# Validating Program Targeting

- MSI clients are poorer on average than the national population
- MSI clients are of similar poverty level to the national population
- MSI clients are less poor on average than the national population

Ghana

Philippines

Ethiopia

Cambodia

Burkina Faso

# Targeting, Screening, Impact Assessment

# Measuring Change Over Time

FIGURE 3. CHANGE IN POVERTY RATES AMONG MFI 2 CLIENTS FROM FIRST TO FOURTH PPI SCORE COLLECTION FROM 2010 TO 2013

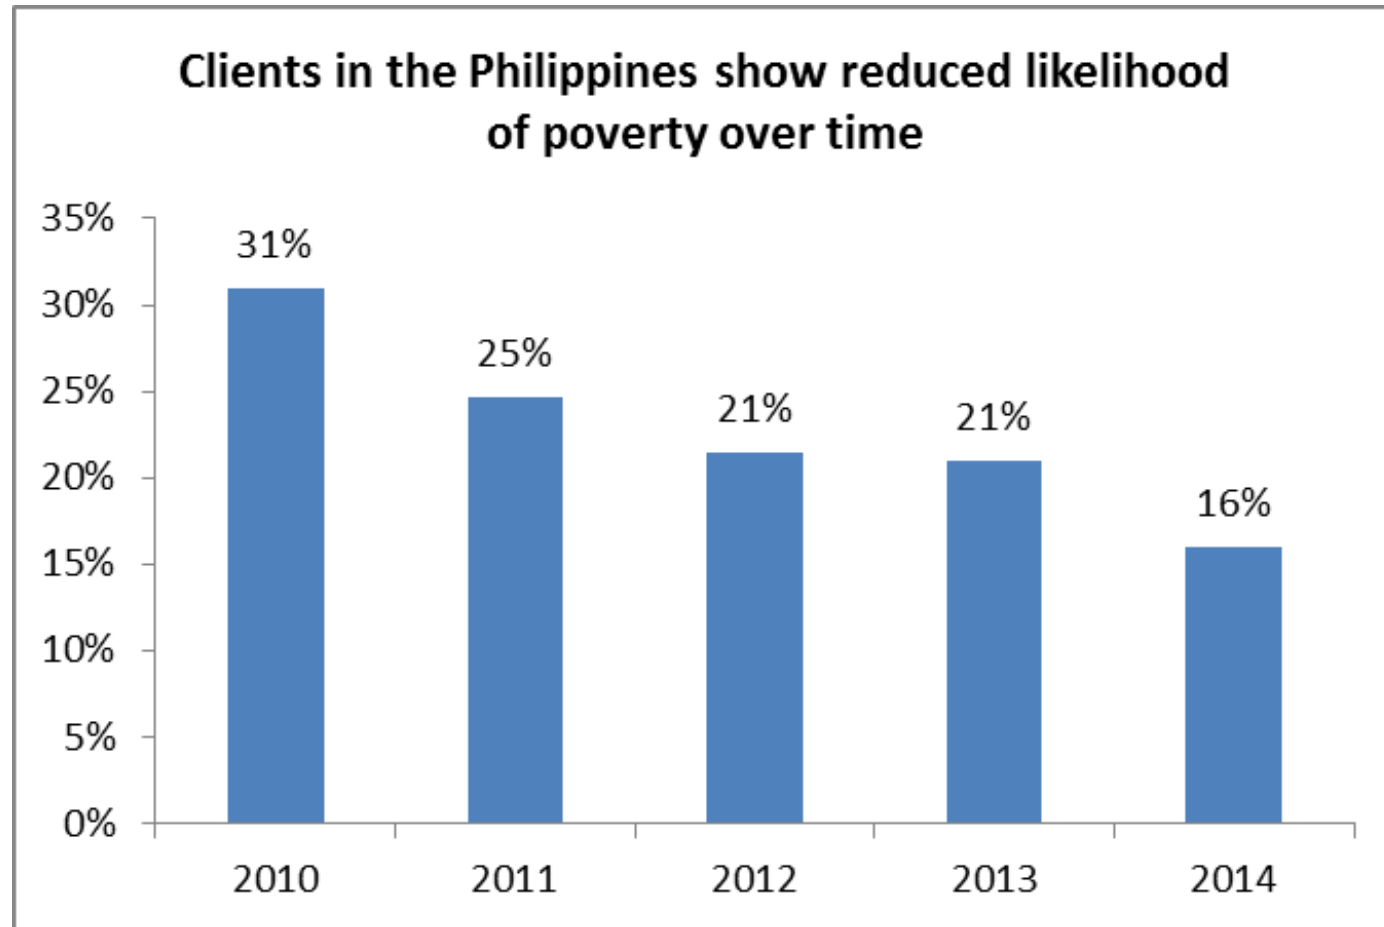

All three groups of clients show an improvement in poverty status [decrease in poverty rate] over time.

# Tracking Poverty Over Time

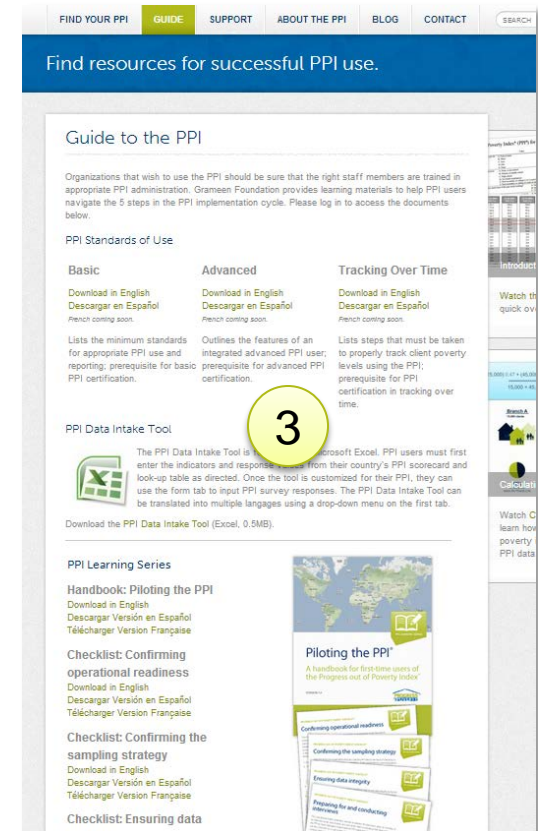

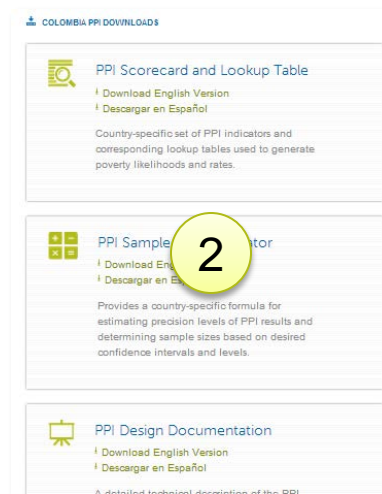

# Small Group Reflection

# Questions for Discussion

- ▶ How is poverty measured in your program?
  - Prevalence of Poverty
  - Depth of Poverty
- ▶ How could PPI be used in your program?
  - As a supplement to required poverty indicators?
- ▶ What challenges would you foresee in using the PPI?
- ▶ What advantages?

# Learn more at [www.progressoutofpoverty.org](http://www.progressoutofpoverty.org)

- ▶ Tanzania
- ▶ Timor-Leste
- ▶ Uganda
- ▶ Vietnam
- ▶ Yemen
- ▶ Zambia

\*China has an expert-based poverty scorecard in place of a PPI.

\*\*Coming Spring 2016

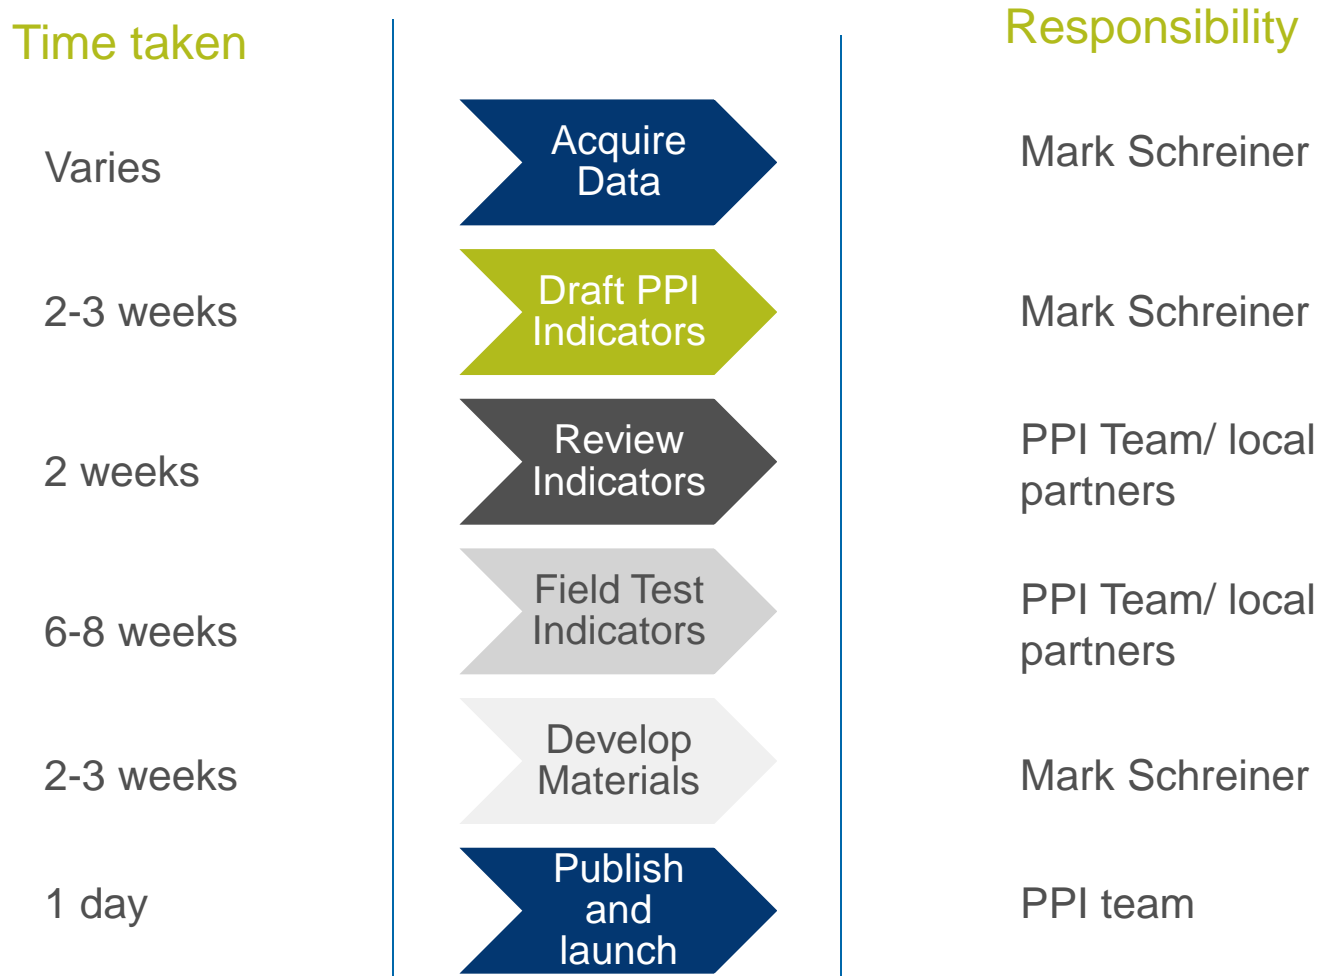

# How is a PPI scorecard constructed?

- ▶ Logit regression with data from national survey
- ▶ In survey, consumption poverty status is known
- ▶ Use statistics (and judgment) to select indicators, group responses, and derive points to reflect link between indicators and poverty status
- ▶ Total points (scores) range from 0 (most likely below poverty line) to 100 (least likely below line)
- ▶ Final scorecard balances goals with constraints of data, statistics, and user acceptance
- ▶ ‘Flat max’ in predictive models mean we can focus on acceptability without sacrificing accuracy

# PPI Development Process

It usually takes 3 to 4 months to build or update a PPI. PPIs are prioritized based on demand, availability of funding and an adequate data set.

View our video on the [PPI Development Process](#) here.

# Data Acquisition

National Household  
Expenditure or Income  
Survey

Obtained from NSO, World Bank, other sources

Provides data in these areas:

- ▶ Household Expenditure
- ▶ Housing
- ▶ Education
- ▶ Household Composition
- ▶ Ownership of durable goods
- ▶ Employment status

# Selecting Potential Indicators

We find the indicators which have the **highest degree of correlation with poverty**

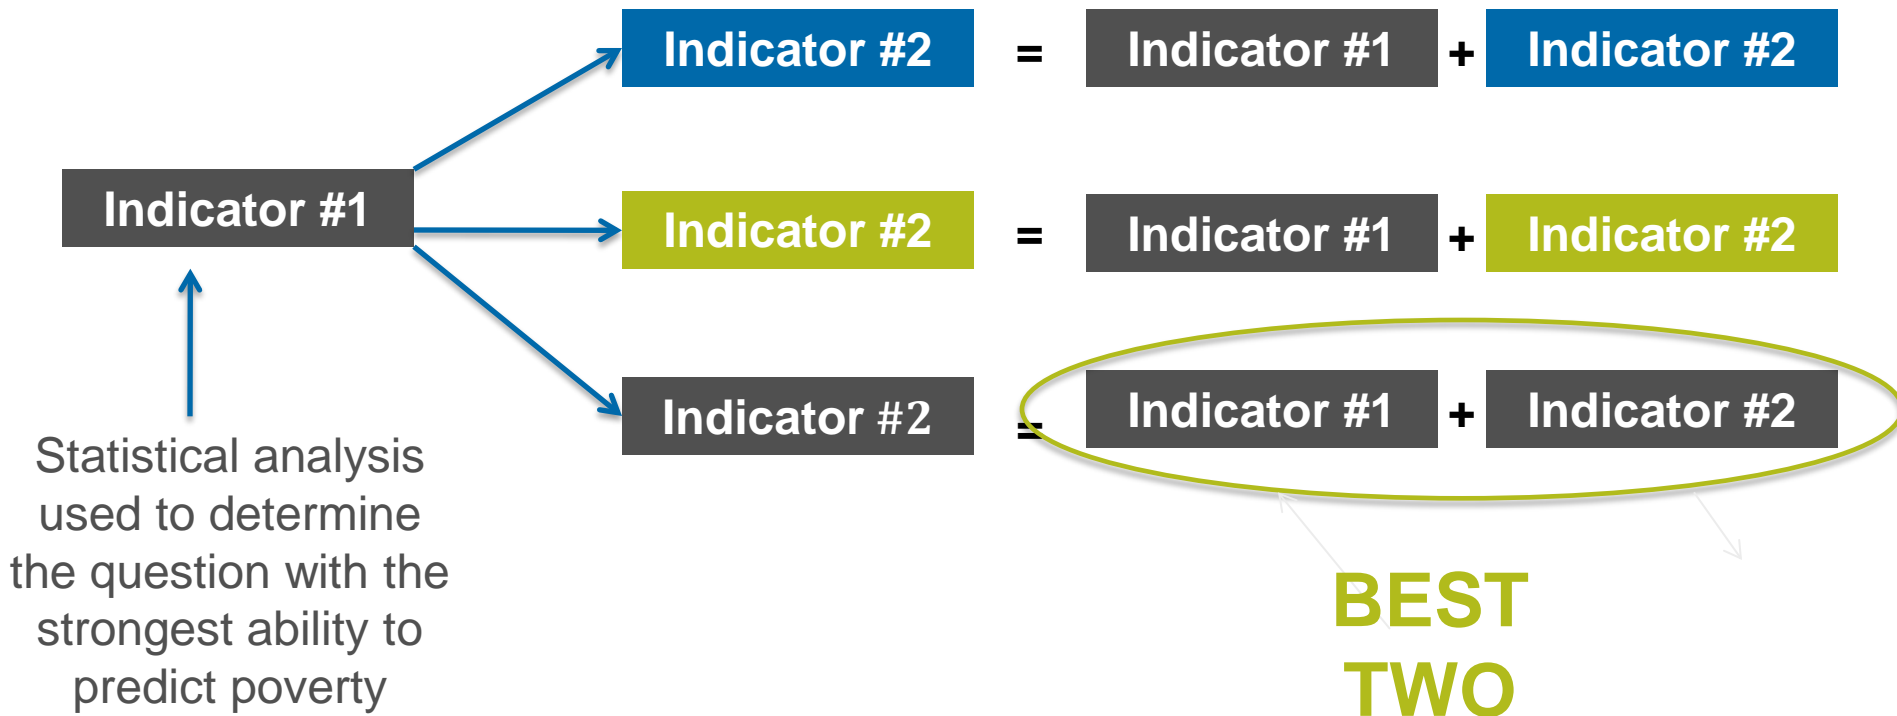

The top indicators are assessed and kept for further review if they are:

- ▶ Inexpensive to collect
- ▶ Simple to verify
- ▶ Easy to answer quickly
- ▶ Liable to change over time as poverty status changes

# Building the PPI Scorecard

Statistical analysis used to determine the best two questions that **TOGETHER** strongly predict poverty

Indicators are **LINKED** and should be **ANALYZED** as a **GROUP**

# Testing Indicators In The Field

Between 15 and 20 indicators are reviewed by users and tested in the field.

- ▶ Potential indicators are **virtually reviewed** by local and global stakeholders
- ▶ Potential indicators are **tested in the field**

## TEST PPI

- Question 1
- Question 2
- Question 3
- Question 4
- Question 5
- Question 6
- Question 7
- Question 8
- Question 9
- Question 10
- Question 11
- Question 12

# Finalizing The PPI Scorecard and Look-up Table

- ▶ Balancing feedback and statistics, the final 10 indicators are derived.
- ▶ Points are statistically calculated for each response option
- ▶ To create the look-up table, the poverty rate for a set of score ranges is calculated using the original national survey data

Indicators	Responses	Score
1. How many members does the household have?	A. Five or more	0
	B. Four	9
	C. Three	14
	D. Two	20
	E. One	23

# Benchmarking Poverty Outreach

## R2R Member Poverty Rates vs. Country and Provincial Poverty Rates

R2R Members' poverty rate (20.3%) at the National Poverty Line is lower than that for the Philippines (31.4%). However, it is higher than that for Metro Manila (3.6%).

View our guide to benchmarking poverty data [here](#)
