

### ***Questions for Care Group Roundtables:***

1. If you are using Care Groups, what modifications has your organization made to the Care Group approach, if any, in your food security programs (compared to the official approach outlined in the *Care Group Criteria* document)? If you are planning to use Care Groups (but have not done so yet), what modifications do you plan to make in the Care Group approach, if any?
2. If you are using Care Groups, what parts of the process of using Care Groups has your organization found to be most challenging? If you are not using Care Groups, what have been the main barriers to your using them?
3. ***(Time permitting:)*** If you have used Care Groups, were there any unexpected positive or negative effects (e.g., decreased domestic violence) that you have found in using Care Groups? What were they?
